SERGIO ARAGONÉS MARGINALS XL

Just because you're seeing Sergio Aragones' "marginal" cartoons at an incredible, giant new size, doesn't mean that your vision has mysteriously and drastically improved. (Well, *probably* not — but who knows, what with all the hormones they're putting in foods these days!) Most of you are merely enjoying Sergio's work in the same cornea-coddling full size he submits them to us! So enjoy — and don't worry about not having super vision, we're sure you have plenty of other special talents!
